The main point of this app is Death Note anime. It is a really good anime! Don't miss it! On the first activity screen, you can click the bloody arrow at the bottom. On the second activity, you can input a name in the text box. After you enter the name, the 'death note' will tell you that it gets your request, and the person you entered died. At the same time the textbox turns to invisible.

```java
package com.example.screens;

import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;
import android.view.Gravity;
import android.view.View;
import android.widget.EditText;
import android.widget.TextView;
import java.lang.*;

public class Activity2 extends AppCompatActivity {
    public  String input_text;
    EditText edit_Text;
    TextView text_view;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_2);

        edit_Text = (EditText)findViewById(R.id.edit_text);
        text_view = (TextView)findViewById(R.id.plan);
    }

    public void switch_activity3(View view){
        input_text = edit_Text.getText().toString();
        String part1 = " is died of unknown reason.";
        String part2 = "  Your request has been sent.\n\n";
        text_view.setGravity(Gravity.CENTER);
        String final_string = part2 + input_text + part1;
        text_view.setText(final_string);
        text_view.setVisibility(View.VISIBLE);
        edit_Text.setVisibility(View.GONE);
    }
}
```

DEATH NOTE

WJKLKJLKDJA

Your request has been sent.

WJKLKJLKDJA is died of unknown reason.

Git log screen shot:

Here is Reference Link I used to write code:
